

Earth History Timeline According to Zecharia Sitchin

Sitchin was born in Russia, was raised in Palestine, and graduated from the University of London with a degree in economic history. He worked for years as a journalist and editor in Israel before settling in New York.

Sitchin, like Velikovsky and Däniken, presents a compelling story based on belief about ancient visitors from other worlds. Zecharia Sitchin's key ideas are based on the assumption that ancient myths are not myths but historical and scientific texts. According to Sitchin, ancient Sumerian clay tablets reveal that gods from another planet (Nibiru, which orbits our Sun every 3,600 years) arrived on Earth some 450,000 years ago and created humans by genetic engineering.

Sumerian Culture and the Anunnaki

Working from the same archaeological discoveries, artifacts, and recovered records as archaeologists and linguists have for two hundred years, Sitchin propounds – proves, in the opinion of this author -- that the Anunnaki (Sumerian: “those who came down from the heavens”; Old testament Hebrew, Anakeim, Nefilim, Elohim; Egyptian: Neter), an advanced civilization from the tenth planet in our solar system, splashed down in the Persian gulf area around 432,000 years ago, colonized the planet, with the purpose of obtaining large quantities of gold. Some 250,000 years ago, the recovered documents tell us, their lower echelon miners rebelled against the conditions in the mines and the Anunnaki directorate decided to create a creature to take their place. Enki, their chief scientist and Ninhursag their chief medical officer, after getting no satisfactory results splicing animal and Homo Erectus genes, merged their Anunnaki genes with that of Homo Erectus and produced us, Homo Sapiens, a genetically bicameral species, for their purposes as slaves. Because we were a hybrid, we could not procreate. The demand for us as workers became greater and we were genetically manipulated to reproduce.

Eventually, we became so numerous that some of us were expelled from the Anunnaki city centres, gradually spreading over the planet. Having become a stable genetic stock and developing more precociously than, perhaps, the Anunnaki had anticipated, the Anunnaki began to be attracted to humans as sexual partners and children were born of these unions. This was unacceptable to the majority of the Anunnaki high council and it was decided to wipe out the human population through a flood that was predictable when Nibiru, the tenth in our solar system and the Anunnaki home planet, came through the inner solar system again (around 12,500 years ago) on one of its periodic 3600 year returns. Some humans were saved by the action of the Anunnaki official, Enki, who was sympathetic to the humans he had originally genetically created. For thousands of years, we were their slaves, their workers, their servants, and their soldiers in their political battles among themselves. The Anunnaki used us in the construction of their palaces (we retroproject the religious notion of temple on these now), their cities, their mining and refining complexes and their astronomical installations on all the continents. They expanded from Mesopotamia to Egypt to India to South and Central America and the stamp of their presence can be found in the farthest reaches of the planet.

Around 6000 years ago, they, probably realizing that they were going to phase off the planet, began, gradually, to bring humans to independence. Sumer, a human civilization, amazing in its “sudden”, mature, and highly advanced character was set up under their tutelage in Mesopotamia. Human kings were inaugurated as go-betweens, foremen of the human populations answering to the Anunnaki. A strain of humans, genetically enhanced with more Anunnaki genes, a bloodline of rulers in a tradition of “servants of the people” was initiated (Gardner). These designated humans were taught technology, mathematics, astronomy, advanced crafts and the ways of advanced civilized society (in schools, called now “mystery schools” but there was no mystery about them). Gardner has brought to light the fact that there exists a robust, highly documented, genealogical, genetic history carrying all the way back to the Anunnaki, possessed by the heterodox tradition of Christianity, which is only now coming forward, no longer gun-shy of the Inquisition. This tradition, preserving the bloodline, is the one branded “heretical” and murderously persecuted by the Roman Church. There were no Dark Ages for this tradition, only for those whom the Church wanted to keep in the dark about the real nature of human history and destroy the bloodline, a direct threat to the power of the Bishops.

What evidence supports the Sitchin thesis?

The Astronomical Evidence

“No concrete problem is going to be solved as long as the experts of astronomy are too supercilious to touch "mythical" ideas - which are firmly believed to be plain nonsense, of course -- as long as historians of religion swear to it that stars and planets were smuggled into originally "healthy" fertility cults and naive fairy tales only "very late" -- whence these unhealthy subjects should be neglected by principle -- and as long as the philologists imagine that familiarity with grammar replaces that scientific knowledge which they lack, and dislike.”

Giorgio de Santillana, Ph.D.& Hertha von Dechend, Ph.D.

Hamlet's Mill

A key underpinning of the Sitchin paradigm is the existence, now or in the past, of the tenth planet in our solar system, the home planet of the Anunnaki with the size, orbit, and characteristics described, as Sitchin has demonstrated, in the Enuma Elish and corroborated by Harrington, former chief of the U.S. Naval Observatory, now deceased.

Tombaugh discovered Pluto in 1930. Christie, of the U.S. Naval Observatory, discovered Charon, Pluto’s moon, in 1978. The characteristics of Pluto derivable from the nature of Charon demonstrated that there must still be a large planet undiscovered because Pluto could not be the cause of the residuals, the “wobbles” in the orbital paths of Uranus and Neptune clearly identifiable. The IRAS (Infrared Astronomical Satellite), during '83 -'84, produced observations of a tenth planet so robust that one of the astronomers on the project said that “all that remains is to name it” -- from which point the information has become curiously guarded. In 1992 Harrington and Van Flandern of the Naval Observatory, working with all the information they had at hand, published their findings and opinion that there is, indeed, a tenth planet, even calling it an “intruder” planet. The search was narrowed to the southern skies, below the ecliptic. Harrington invited Sitchin, having read his book and translations of the Enuma Elish, to a meeting at his office and they correlated the current findings with the ancient records.

The recovered Enuma Elish document, a history of the formation of our solar system and more, says that, at the time when Mercury, Venus, Mars, Jupiter, Uranus and Saturn were in place, there was a Uranus sized planet, called Tiamat, in orbit between Mars and Jupiter. Earth was not in place yet. A large wandering planet, called Nibiru, was captured into the system gravitationally. As it passed by the outer planets it caused the anomalies of their moons, the tilting of Uranus on its side, the dislodging of Pluto from its being a moon of Saturn to its own planetary orbit. Its path bent by the gravitational pull of the large planets, first its satellites collided with the large planet Tiamat and, on a second orbit through, Nibiru collided with Tiamat, driving the larger part of it into what is now Earth’s orbit to recondense as Earth, dragging its moon with it to become our Moon with all its anomalies. The shattered debris of Tiamat’s smaller part became the asteroid belt, comets, and meteorites. The gouge of our Pacific basin is awesome testimony to the collisional event. Nibiru settled into a 3600 year elliptical retrograde (opposite direction to all the other planets) orbit around our sun, coming in through the asteroid belt region between Mars and Jupiter at perigee and swinging far out past Pluto at apogee. Harrington acknowledged that his information agreed with all these details and the maps they each had drawn of the orbits were almost indistinguishable. The current probable location of Nibiru (Planet X, our tenth) estimated by both was the same.

It is the opinion of this author and others that, in light of the evidence already obtained through the use of the Pioneer 10 and 11 and two Voyager space craft, the Infrared Imaging Satellite (IRAS, '83-84) and the clear and unequivocal statements of Harrington when consulting with Sitchin, that the search has already been accomplished, in fact that the planet has already been found.

We need to force the issue of the tenth planet being in our solar system, not just to demonstrate the validity of the new paradigm but for a very practical reason. The ancient records are very clear. The passage of the tenth planet, Nibiru, once every 3600 years, through the inner solar system effects the Earth, sometimes in catastrophic ways. It is very probably the cause of pole shifts, pole reversals, changes in the precessional movement, perhaps even catastrophic bombardment by asteroid size space debris that it may drag along with it. Since it passes through the asteroid belt area between Mars and Jupiter and its orbital path may vary depending on the position of the other planets when it comes though, it may have been responsible for the devastation of Mars. A rigorous, detailed computer modeling of the solar system, including the tenth planet needs to be done urgently for our own planetary safety. Remember that the Vatican maintains an astronomical observatory and Msgr. Balducci may have access to information that prompts him to make the amazing statements he has --- no doubt as voice of the Vatican.

The Technological Evidence

Ooparts is the term used to describe the purportedly out of place in time artifacts, toys, tools, technical devices, depictions and documents which have come to light through archaeological excavation or discovery. Almost everyone is familiar, through published works or documentaries, with the clay pot batteries still containing the electrodes from the Iraqi desert dated at 2500 B.C., the flyable model airplane from a pyramid tomb, the sophisticated machining of stone requiring the most advanced techniques we know today, the 1000 ton precision cut blocks of stone in a temple foundation that we could not even handle, an ancient relief frieze from an Abydos temple depicting rockets, airplanes and even a helicopter, etc. The most recent and quite amazing oopart is the rediscovery of monoatomic gold by David Hudson (Monoatomics are superconductors at room temperature, have anti-gravitic properties and are only now being investigated by the advanced physics community) Hudson's discovery, correlated with the bringing to light, by Gardner, of the suppressed discovery of the Anunnaki gold processing plant on Mt. Horeb by Sir Flinders Petrie in 1889 demonstrates that the monoatomics were already known at least 3000 years ago. These ooparts coupled with evidence from many disciplines and the historical records indicate that an advanced civilization existed in those times possessing a high technology and that that civilization was indeed the Anunnaki.

The Documentary Evidence

The recorded historical documentation for the existence and deeds of the Anunnaki has become gradually available to us only since the early 1800's. The excavation of the ancient sites of Mesopotamia brought to light the amazingly advanced civilization of Sumer and, with it, thousands of clay tablets containing not only mundane records of commerce, marriages, military actions and advanced astronomical calculation systems but of the history of the Anunnaki themselves. It is clear from those records that the Sumerians knew these aliens to be real flesh and blood. The library of the ruler, Ashurbanipal, at Nineveh was discovered to have burnt down and the clay tablets held there were fired, preserving them for our reading. One of the most impressive finds, in very recent time, has been a sealed, nine foot by six foot room in Sippar holding, neatly arranged on shelves, a set of some 400 elaborate clay tablets containing an unbroken record of the history of those ancient times, a sort of time capsule. The evidence is so overwhelming and robust that, if it weren't for those with power enough to suppress, it would have been accepted and our world view changed a century ago or, perhaps, sooner.

The Genetic Evidence

The recovered records place the location of the Anunnaki laboratory where the first humans were literally produced in east central Africa just above their gold mines. This falls precisely on the map where the mitochondrial DNA "search for Eve" places the first woman Homo Sapiens and in the same period. (The gold mining engineers of Africa have found 100,000-year-old gold mines in that area.) The evidence for, and description of advanced genetic engineering is all there in the ancient documents. Our rapid progress from inception to going to Mars soon, after only 250,000 years, does not correspond to the million year periodicities of slow evolutionary development of other species such as Homo Erectus before us. As so many thinkers have pointed out, we are radically and anomalously different.

Scientific Objections to the Thesis

How could the Anunnaki, clearly described as comfortable in earth gravity and atmosphere, very similar to current humans in all ways, have evolved on a planet within our solar system whose orbital apogee takes it into the deep cold of space for much of its orbit?

The ancient records repeatedly describe Nibiru as a "radiant" planet. This may be understood as having a high core temperature. Although controversial, there is also astrophysical opinion that a large body in elongated orbit is constantly tending toward circular orbit and this causes stresses in the body that could generate a good deal of heat. That their planet is gradually cooling, may be indicated by Sitchin's interpretation of their colonizing Earth (contains most of the gold identifiable in the solar system) for the purpose of obtaining large quantities of gold for molecular seeding of their atmosphere with a reflective gold shielding.

Pertinent here is Harrington's confident statement to Sitchin that it is "a nice, good planet, could be surrounded by gases, probably has an atmosphere and could support life like ours". The sunlight level there might be quite different than on earth. The Anunnaki were often depicted or sculpted with what seem to be obviously sunglasses.

If, however, the Anunnaki evolved on a radically different planet from earth under quite different conditions to which to adapt, why should they have turned out to be so identical to human species? Sitchin's answer is based on the collisional event between the intruder planet, Nibiru, and the planet Tiamat, the residual part of which recondensed into the Earth after being driven into current Earth orbit. That the two, or at least one, of the colliding planets was sufficiently developed to have evolved basic organic compounds, perhaps even simple life, the cross-seeding of everything from amino acids to more complicated organic compounds or even primitive organisms, could account for the evolutionary similarity. Although this author finds it a reasonable hypothesis, even trivial, that advanced civilizations would be capable of crossing extremely different genomes, perhaps with even radically different bases, the cross-seeding theory can account for the apparent relative ease with which the Anunnaki impinged their genes on the genes of Homo Erectus. The Anunnaki skill level, 200,000 years ago, is indicated well by the recorded fact that, in early trials, they succeeded in crossing animal genes with Homo Erectus genes, obtained living hybrids but never a satisfactory product which led them to modify Homo Erectus genes with their advanced genes.

If our genome is estimated as 98% to 99% similar to the chimpanzee, how could there be a melding of the Homo Erectus and Anunnaki genomes, or impingement of the advanced code on the lesser advanced one detectable? The author suggests that this is a major question probably answerable only by the geneticists open-minded enough to attack it. The resolution of that question should provide rich additional clues in itself.

Earth History Timeline

Events Before The Deluge

450,000 years ago,

On Nibiru, a distant member of our solar system, life faces slow extinction as the planet's atmosphere erodes. Deposed by Anu, the ruler Alalu escapes in a spaceship and finds refuge on Earth. He discovers that Earth has gold that can be used to protect Nibiru's atmosphere.

445,000

Led by Enki, a son of Anu, the Anunnaki land on Earth, establish Eridu -Earth Station I - for extracting gold from the waters of the Persian Gulf.

430,000

Earth's climate mellows. More Anunnaki arrive on Earth, among them Enki's half-sister Ninhursag, Chief Medical Officer.

416,000

As gold production falters, Anu arrives on Earth with Enlil, the heir apparent. It is decided to obtain the vital gold by mining it in southern Africa. Drawing lots, Enlil wins command of Earth Mission; Enki is relegated to Africa. On departing Earth, Anu is challenged by Alalu's grandson.

400,000

Seven functional settlements in southern Mesopotamia include a Spaceport (Sippar), Mission Control Center (Nippur), a metallurgical center (Shuruppak). The ores arrive by ships from Africa; the refined metal is sent aloft to orbiters manned by Igigi, then transferred to spaceships arriving periodically from Nibiru.

380,000

Gaining the support of the Igigi, Alalu's grandson attempts to seize mastery over Earth. The Enlilites win the War of the Olden Gods.

300,000

The Anunnaki toiling in the gold mines mutiny. Enki and Ninhursag create Primitive Workers through genetic manipulation of Ape woman; they take over the manual chores of the Anunnaki. Enlil raids the mines, brings the Primitive Workers to the Edin in Mesopotamia. Given the ability to procreate, Homo Sapiens begins to multiply.

200,000

Life on Earth regresses during a new glacial period.

100,000

Climate warms again. The Anunnaki (the biblical Nefilim), to Enlil's growing annoyance marry the daughters of Man.

75,000

The "accusation of Earth" - a new Ice Age-begins. Regressive types of Man roam the Earth . Cro-Magnon man survives.

49,000

Enki and Ninhursag elevate humans of Anunnaki parentage to rule in Shuruppak. Enlil, enraged. plots Mankind's demise.

13,000

Realizing that the passage of Nibiru in Earth's proximity will trigger an immense tidal wave, Enlil makes the Anunnaki swear to keep the impending calamity a secret from Mankind.

Events After The Deluge

11,000 B.C.

Enki breaks the oath, instructs Ziusudra/Noah to build a submersible ship. The Deluge sweeps over the Earth; the Anunnaki witness the total destruction from their orbiting spacecraft.

Enlil agrees to grant the remnants of Mankind implements and seeds; agriculture begins in the highlands. Enki domesticates animals.

10,500 B.C.

The descendants of Noah are allotted three regions. Ninurta, Enlil's foremost son, dams the mountains and drains the rivers to make Mesopotamia habitable; Enki reclaims the Nile valley. The Sinai peninsula is retained by the Anunnaki for a post-Diluvial spaceport; a control centre is established on Mount Moriah (the future Jerusalem).

9,780 B.C.

Ra/Marduk, Enki's firstborn son, divides dominion over Egypt between Osiris and Seth.

9,330 B.C.

Seth seizes and dismembers Osiris, assumes sole rule over the Nile Valley.

8,970 B.C.

Horus avenges his father Osiris by launching the First Pyramid War. Seth escapes to Asia, seizes the Sinai Peninsula and Canaan.

8,670 B.C.

Opposed to the resulting control of all the space facilities by Enki's descendants, the Enlilites launch the Second Pyramid War. The victorious Ninurta empties the Great Pyramid of its equipment.

Ninhursag, half-sister of Enki and Enlil, convenes peace conference. The division of Earth is reaffirmed. Rule over Egypt transferred from the Ra/Marduk dynasty to that of Thoth. Heliopolis built as a substitute Beacon City.

8,500 B.C.

The Anunnaki establish outposts at the gateway to the space facilities; Jericho is one of them.

7,400 B.C.

As the era of peace continues, the Anunnaki grant Mankind new advances; the Neolithic period begins. Demi-gods rule over Egypt.

3,800 B.C.

Urban civilization begins in Sumer as the Anunnaki reestablish there the Olden Cities, beginning with Eridu and Nippur.

Anu comes to Earth for a pageantful visit. A new city, Uruk (Erech), is built in his honor; he makes its temple the abode of his beloved granddaughter Inanna/Ishtar.

Kingship on Earth

3,760 B.C.

Mankind granted kingship. Kish is first capital under the aegis of Ninurta. The alendar begun at Nippur. Civilization blossoms out in Sumer (the First Region).

3,450 B.C.

Primacy in Sumer transferred to Nannar/Sin. Marduk proclaims Babylon "Gateway of the Gods." The "Tower of Babel" incident. The Anunnaki confuse Mankind's languages. His coup frustrated, Marduk/Ra returns to Egypt, deposes Thoth, seizes his younger brother Dumuzi who had betrothed Inanna. Dumuzi accidentally killed; Marduk imprisoned alive in the Great Pyramid. Freed through an emergency shaft, he goes into exile.

3,100-3, B.C.

350 years of chaos end with installation of first Egyptian Pharaoh in Memphis. Civilization comes to the Second Region.

2,900 B.C.

Kingship in Sumer transferred to Erech. Inanna given dominion over the Third Region; the Indus Valley Civilization begins.

2,650 B.C.

Sumer's royal capital shifts about. Kingship deteriorates. Enlil loses patience with the unruly human multitudes.

2,371 B.C.

Inanna falls in love with Sharru-Kin (Sargon). He establishes new capital city. Agade (Akkad). Akkadian empire launched.

2,316 B.C.

Aiming to rule the four regions, Sargon removes sacred soil from Babylon. The Marduk-Inanna conflict flares up again. It ends when Nergal, Marduk's brother, journeys from south Africa to Babylon and persuades Marduk to leave Mesopotamia.

2,291 B.C.

Naram-Sin ascends the throne of Akkad. Directed by the warlike Inanna, he penetrates the Sinai Peninsula, invades Egypt.

2,255 B.C.

Inanna usurps the power in Mesopotamia; Naram-Sin defies Nippur. The Great Anunnaki obliterate Agade. Inanna escapes. Sumer and Akkad occupied by foreign troops loyal to Enlil and Ninurta.

2,220 B.C.

Sumerian civilization rises to new heights under enlightened rulers of Lagash. Thoth helps its king Gudea build a ziggurat-temple for Ninurta.

2,193 B.C.

Terah, Abraham's father, born in Nippur into a priestly-royal family.

2,180 B.C.

Egypt divided; followers of Ra/Marduk retain the south; Pharaohs opposed to him gain the throne of lower Egypt.

2,130 B.C.

As Enlil and Ninurta are increasingly away, central authority also deteriorates in Mesopotamia. Inanna's attempts to regain the kingship for Erech does not last.

The Fateful Century

2,123 B.C.

Abraham born in Nippur.

2,113 B.C.

Enlil entrusts the Lands of Shem to Nannar; Ur declared capital of new empire. Ur- Nammumu ascends throne, is named Protector of Nippur. A Nippurian priest-Terah, Abraham's father - comes to Ur to liaison with its royal court.

2,096 B.C.

Ur-Nammumu dies in battle. The people consider his untimely death a betrayal by Anu and Enlil. Terah departs with his family for Harran.

2,095 B.C.

Shulgi ascends the throne of Ur, strengthens imperial ties. As empire thrives, Shulgi falls under charms of Inanna, becomes her lover. Grants Larsa to Elamites in exchange for serving as his Foreign Legion.

2,080 B.C.

Theban princes loyal to Ra/Marduk press northward under Mentuhotep I. Nabu, Marduk's son, gains adherents for his father in Western Asia.

2,055 B.C.

On Nannar's orders, Shulgi sends Elamite troops to suppress unrest in Canaanite cities. Elamites reach the gateway to the Sinai peninsula and its Spaceport.

2,048 B.C.

Shulgi dies. Marduk moves to the Land of the Hittites. Abraham ordered to southern Canaan with an elite corps of cavalrymen.

2,047 B.C.

Amar-Sin (the biblical Amraphel) becomes king of Ur. Abraham goes to Egypt, stays five years, then returns with more troops.

2,041 B.C.

Guided by Inanna, Amar-Sin forms a coalition of Kings of the East, launches military expedition to Canaan and the Sinai. Its leader is the Elamite Khedor-la'omer. Abraham blocks the advance at the gateway to the Spaceport.

2,038 B.C.

Shu-Sin replaces Amar-Sin on throne of Ur as the empire disintegrates.

2,029 B.C.

Ibbi-Sin replaces Shu-Sin. The western provinces increasingly to Marduk.

2,024 B.C.

Leading his followers, Marduk marches on Sumer, enthrones himself in Babylon. Fighting spreads to central Mesopotamia. Nippur's Holy of Holies is defiled. Enlil demands punishment for Marduk and Nabu; Enki opposes, but his son Nergal sides with Enlil.

As Nabu marshals his Canaanite followers to capture the Spaceport, the Great Anunnaki approve of the use of nuclear weapons. Nergal and Ninurta destroy the Spaceport and the errant Canaanite cities.

2,023 B.C.

The winds carry the radioactive cloud to Sumer. People die a terrible death, animals perish, the water is poisoned, the soil becomes barren. Sumer and its great civilization lie prostrate. Its legacy passes to Abraham's seed as he begets -at age 100- a legitimate heir: Isaac.
